

Ms Tay is currently a year 4 student at Nanyang Technological University, pursuing Bachelor of Arts (Hons) in Chinese studies and minoring in Translation. She has worked closely with Ministry of Education in the past, as a teaching intern from June to July 2017 and as a student intern at MOE Curriculum Planning and Development Division from May to July 2019. In addition, during her exchange programme at the Taiwan National Tsing Hua University, she was selected to be a student tutor as part of the Chinese Society and Culture Module. Because of Ideographic characteristics of each Chinese word, Ms Tay believes that this language is best learnt by understanding the story behind the words as well as the phrases. Hence, with her strong education background in Chinese language, she is able to provide the students with relevant information in the field. Also, with her interesting in-house practices, the student will get to learn the language in a fun and effective way!
